

A PASSION FOR QUALITY

As turbocharger maintenance and repair becomes more and more complex, you need a supplier who meets worldwide quality standards.

As evidence to our commitment to provide outstanding service to our customers, on October 10, 2005 TurboUSA was approved by Lloyd's Register Quality Assurance to the management standards of ISO 9001:2000.

ISO 9001

AUTHORIZED MET AGENT

THERMAL METAL SPRAY

TurboUSA has the only Lloyd's Register approved thermal spray repair process in the Americas.

This represents a significant advance in providing our customers with quality parts at value pricing.

Unlike the "Cold Repair" procedure where a new layer is added to the shaft at a temperature below 300°C, TurboUSA's thermal spray procedure fuses the sprayed layer and the underlying metal at a temperature approximating 1,200°C.

When Time is of the Essence

TURBOCHARGER PARTS, REPAIR & SERVICE

PREMIER SUPPLIER TO THE AMERICAS

TurboUSA

PREMIER SUPPLIER TO THE AMERICAS

In recent years the output of diesel engines has steadily increased. As a result, turbochargers are being stretched to their limits as they turn faster and faster. The challenge for the operator is to maintain safe, reliable and efficient turbochargers under these conditions.

TurboUSA helps vessel and power plant operators to avoid the cost and embarrassment of unplanned downtime and breakdowns.

THE TURBOUSA DIFFERENCE

- Largest Parts Inventory in the Americas
- Worldwide Field Service
- State-of-the-Art Technical Center
- ISO 9001:2000 Certification

LARGEST PART INVENTORY IN THE AMERICAS

TurboUSA has the largest parts inventory in North America and 95% of our orders are shipped within 24 hours.

At TurboUSA there are no quality compromises as all parts meet or exceed OEM specs.

TurboUSA has a complete range of parts for ABB, MET, MAN, NAPIER and more.

FIELD SERVICE WHENEVER & WHEREVER

Whether you need routine scheduled maintenance, an overhaul or emergency repairs, TurboUSA is ready to help.

TurboUSA is the #1 aftermarket choice for ABB parts, repair and service in the Americas. We also provide parts and field service for MAN, MET, NAPIER and more.

TurboUSA has established strategic alliances to meet customer turbocharger needs anywhere in the world.

Whether you need parts, routine maintenance or an overhaul, TurboUSA, an ISO 9001:2000 certified company, is available whenever and wherever you need us.

STATE-OF-THE-ART TECHNICAL CENTER

Under rigorous quality control standards, Technical Center employees repair and recondition parts.

Customer benefits include faster repair response times and a lower-cost quality alternative to new parts.

- Hot Metal Spray
- Ultrasonic Inspection
- Ultraviolet Crack Detection
- Hydrostatic Testing
- Dynamic Balancing
- Steam Cleaning
- Glass Bead Blasting
- Micro Blasting
- Blade Repair
- Wet Blasting

KEY OEM TURBOCHARGER RELATIONSHIPS

TurboUSA is an authorized representative of Mitsubishi MET turbochargers. We offer genuine MET parts and our field service engineers are trained in Nagasaki, Japan.

TurboUSA is also a member of the STX Enpaco MAN turbocharger network. Our field service engineers receive training in Daegu, South Korea and we offer OEM parts.
